

## Measures to prevent the spread of COVID-19

Japan Industrial Safety and Health Association (JISHA) takes the following measures to prevent the spread of COVID-19.

We would like to ask everyone who participates in the SAKURA Project to cooperate in preventing the spread of infection.

### 1. Infection prevention measures taken by the Japanese government

Please be sure to check the following sites for immigration restrictions imposed by the Japanese government.

Also, please provide the participants with the latest information on travel from the company to which they belong.

### 2. Infection prevention measures taken by JISHA

- (1) Ensuring personal distance
- (2) Wearing masks for secretariat staff and instructors, and using face shields as needed
- (3) Installation of alcohol for hand disinfection (reception desk, venue entrance)
- (4) Prior disinfection of doorknobs, desks, chairs, etc. at the venue
- (5) Constant ventilation during training by ventilation system, as well as regular ventilation by opening windows and doors
- (6) Installation of non-contact thermometer

### 3. Requests to participants

(1) If you have any of the following symptoms on the day of the training, please refrain from participating.

- Have a fever of 37.5 degrees or more
- Have cold symptoms or fever
- feel strong tiredness
- feel stuffy

(2) Please cooperate if we may have your body temperature taken at the reception on the day of the training.

(3) Please wear a mask at the venue, including during training, breaks, and restrooms.

(4) Please wash your hands, wear a mask, perform cough etiquette and use alcohol for hand disinfection.

(5) If you feel unwell during the training, please contact the secretariat as soon as possible. Please note that we may ask you to refrain from participating after confirming symptoms such as fever.

※If you are absent on the day or have any questions, please contact the SAKURA Project secretariat.
