LOGO OF OUR COMPANY

Flags

- Introduction:
- SSSC was found in 1995, between the following partner:
- 1. Southern Steel Corporation – Viet Nam (SSC).
- 2. Federal Iron Works – Malaysia (FIW).
- 3. Sumitomo Corporation – Japan.

Introduction:

- Main products: GI steel sheet & pre painted GI steel sheet in coil form.
- The machinery & equipment include the Continuous Galvanizing Line & the Continuous Color Line
- * Galvanizing Line: 100.000 TPY.
* Pre painted GI Line : 70.000 TPY.

Producing in accordance with Japanese industrial standards: JIS G3302 and JIS G3312.

About new project

- 150.000 tpy Galvanizing & galvalume line
- First coil: 12.2008

SAFETY IN SSSC

TARGET:

1. Zero harm.
2. 100% machinery and equipment having strick safety requirements are register & audit.
3. 100% workers have been training for the standards, regulation and measures ensuring OSH.
4. Health care and prevention of occupational diseases for worker.
5. Improvement of working condition.

The dangerous and harmful element, the risks of accidents in the course of operation.

Equipment having strict occupational safety requirements

- Steam boiler
- Pressure tanks with pressed operational is 7kg/cm².

A large, white, horizontal cylindrical storage tank is the central focus of the image. It is situated outdoors at an industrial facility, supported by a concrete base. The tank has two small, dark, rectangular access points on its side. To the left of the tank, there is a yellow metal structure, possibly a ladder or part of a crane. In the background, there are various pipes, valves, and other industrial equipment, including a smaller white tank and a red barrel. The sky is blue with some white clouds, and there are green trees in the distance.

Equipment having strict occupational safety requirements

- Tanks, barrels used for storage. (LPG)

Rolling bridge cranes

A photograph of an industrial machine, likely a metal rolling mill, with a large rotating wheel and a mechanical arm. A safety cage made of metal mesh is in the foreground, with a red warning sign that reads "CẤM VÀO KHI MÁY ĐANG HOẠT ĐỘNG" (No entry when the machine is operating). The scene is dimly lit, with some sparks or heat visible near the machine.

Unhealthy

DANGEROUS and UNHEALTHY

- Rolls moving & Sheet moving.
- Poison gas & Poison chemical.
- High temperature & Noise.
