STRUCTURE AND ORGANIZATION OF MINISTRY OF MANPOWER

Structure and Organization of Directorate of Occupational Safety and Health Examination Development

Occurrence status of industrial/occupational accidents and occupational diseases

Workplace Accident in Period 2019 - 2023

Year	Accident	Ratio/10.000 labor
2019	182.835	54
2020	221.740	74
2021	234.370	76
2022	298.137	83
2023	370.747	84

- The number of occupational accidents in Indonesia have been increasing in recent years.
- The employer is required to submit a formal report to the local office of the Ministry of Manpower within 2x24 hours after the accident occurs. This report includes detailed information about the accident and the injured worker. They must also report the accident to BPJS for claims related to work accident insurance.
- Data collection methods from BPJS Website

Worker's Accident Compensation Insurance

❖ Government  Employment Social Security Administration (BPJS Ketenagakerjaan)

- It is mandatory for worker to participate in the social security programs managed by BPJS Ketenagakerjaan.
- BPJS Ketenagakerjaan offers various social security protections, including work accident insurance, death insurance, old age savings, and pension security.
- BPJS Ketenagakerjaan processes the insurance claims for the injured worker, providing benefits such as medical treatment, compensation for lost wages, and, in the case of fatality, benefits for the worker's family.

❖ Private  Insurance company

Occupational Health Challenges

- **Start to improve health factor in OSH management system, because nowday company still focus in safety.**
- **The most common occupational disease in Indonesia is lung diseases caused by exposure to dust particle.**
- **Nowday, HIV/AIDS and Tuberculosis become important issue because Indonesian worker susceptible to infected it.**
- **Musculoskeletal disorder and occupational psychology**

Challenges in Implementing OSH

National Occupational Safety and Health Programme
2024–2029

STRATEGIC ACTION

National Occupational Safety and Health Programme
2024–2029

Strengthening
the OSH legal
framework

Shaping an
OSH culture
and
implementation
, supervision
and
enforcement of
OSH norms

Strengthening
OSH resource
capacity

Strengthening
the OSH
reporting and
information
management
system

Strengthening
OSH synergy,
coordination
and
collaboration

Prioritized Activities

The strategy for strengthening the OSH legal framework is implemented through the following prioritized activities:

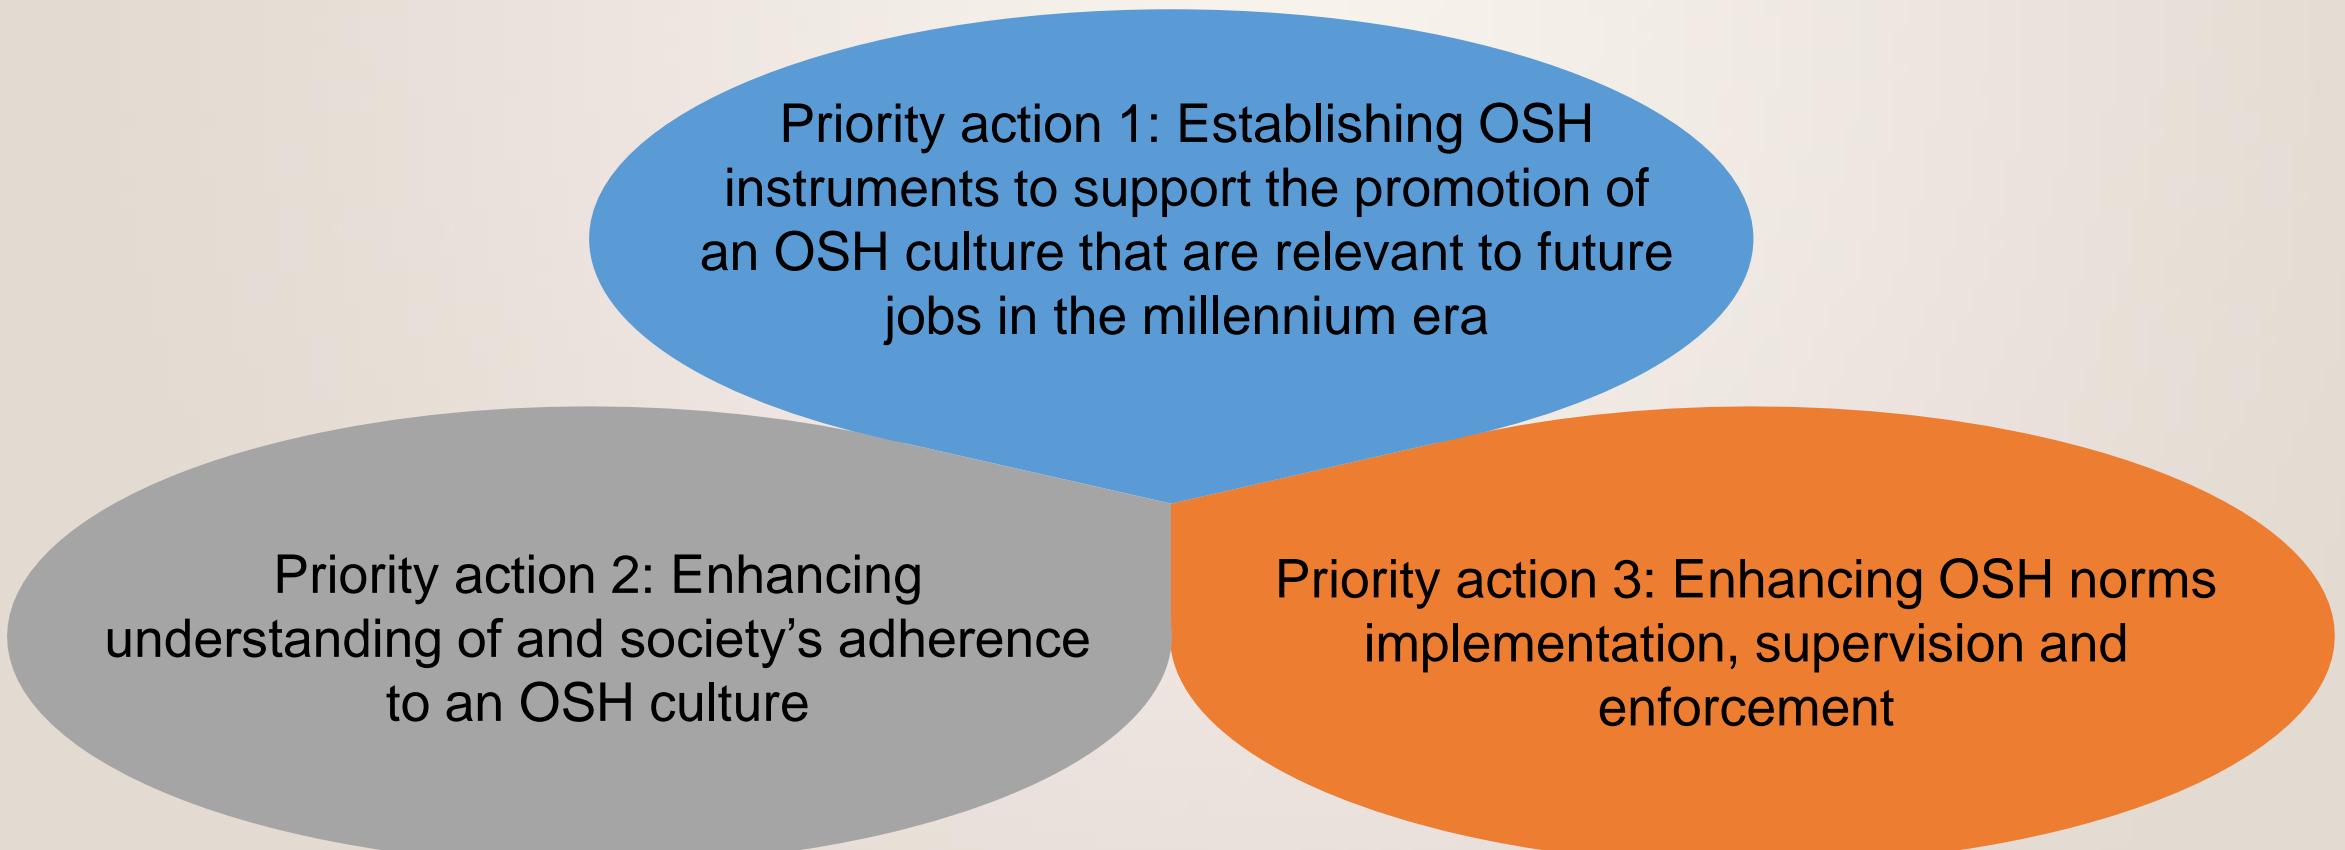

Priority action 1: Revising Law1/1970

Priority action 2: Identifying the need for new regulations derived from the revision of Law 1/1970

Priority action 3: Drafting a presidential decree on the national promotion of an OSH culture for all industrial categories and new types of work.

Prioritized Activities

Shaping an OSH culture and supervising the implementation of OSH norms refer to the key aspects of managing and promoting a strong OSH programme within an organization, The priorities are:

Prioritized Activities

The strategy for strengthening OSH resources will be implemented by setting the following priorities:

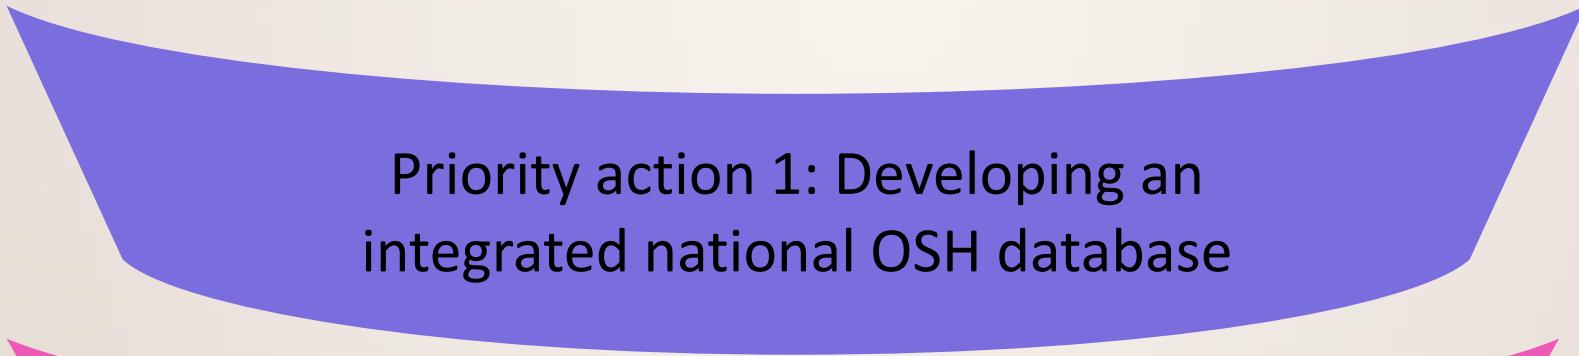

Priority action 1: Improving the quality and competence of OSH human resources

Priority action 2: Improving the quality and effectiveness of OSH facilities and infrastructure

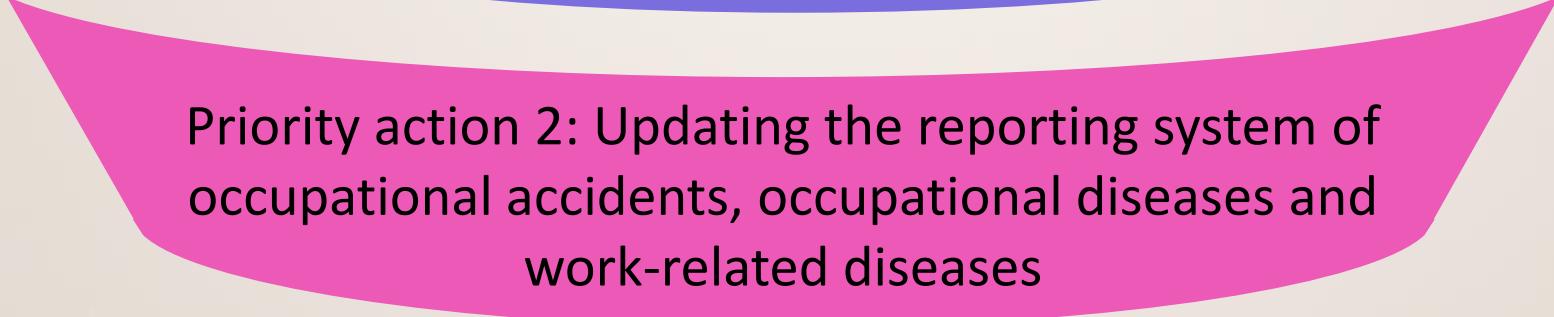

Priority action 3: Improving the quality and performance of OSH organizations

Prioritized Activities

The strategy for strengthening the national OSH reporting and information management system will be implemented through the following priorities:

Priority action 1: Developing an integrated national OSH database

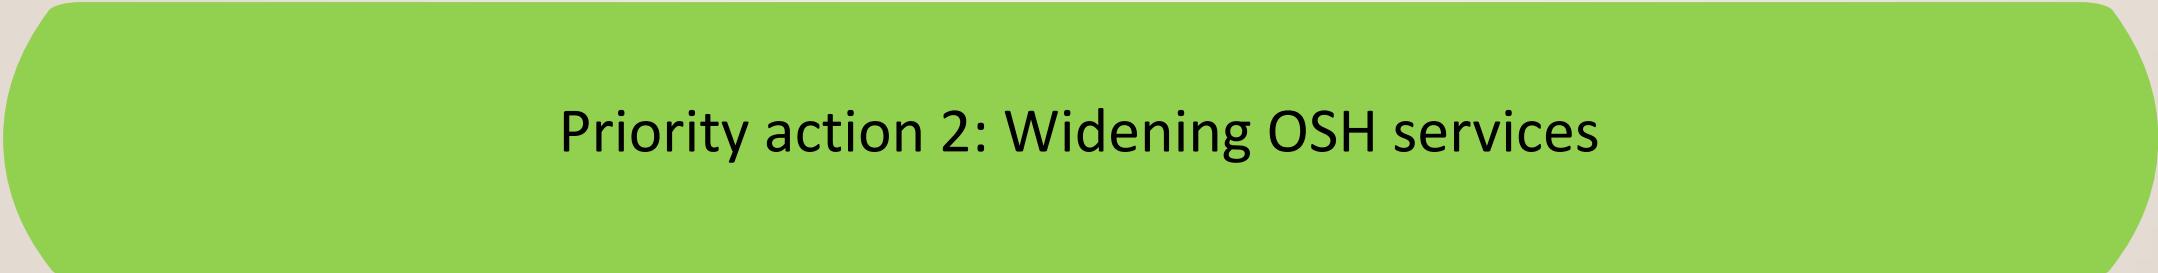

Priority action 2: Updating the reporting system of occupational accidents, occupational diseases and work-related diseases

Prioritized Activities

The strategy for strengthening the national OSH synergy, coordination and collaboration will be implemented by setting the following priorities:

Priority action 1: Establishing a national-level
OSH agency

Priority action 2: Widening OSH services
